

## **Saskatchewan Childcare Subsidy**

Organizing childcare for your children can be a stressful endeavor. With numerous factors to consider when choosing a childcare facility, it can become overwhelming arranging the best care for your children. In addition to the wide variety of factors to consider, cost is another major stressor associated with childcare. With cost of living increasing rapidly, it can be daunting trying to include the costs of childcare in your budget. Over the past year, the Government of Saskatchewan has created a Childcare Subsidy Program for those who are accessing licensed and regulated childcare centers in the province. The subsidy is determined based on income and family size; visit the link below to determine if you are eligible to receive the subsidy for childcare services.
